IT CONSULTANT – WEB & SOFTWARE DEVELOPER– TEAM LEADER SYSTEMS & DATABASE ADMINISTRATOR – IT MANAGER

Offering innovated and enterprising solutions

Technically advanced in the professional management and implementation of e-business solutions, focused primarily towards formulating and actualise structured solutions for business and end-user. I have the ability to deliver dynamic results within a team or as an individual on multiple projects simultaneously. Possessing strong analytical and problem solving skills, coupled with excellent interpersonal/communication skills.

My most recent fulltime position was as IT manager for an International company, were my primary responsibility was to co-ordinating multiple systems. Among my responsibilities was the database administration of over 60 databases affiliated with various systems/applications & web administration. Prior to my managerial role I was the company's senior software developer and was accountable for the development & maintenance of in-house Point-of-sale software and e-commerce sites spanning 4 countries. I regularly provided front-line support for internal/external staff and end users while being centrally involved in the full development life cycle of all current projects.

Possessing a strong background in all core business functions: network, web, software, and upper management reporting solutions. I am a reliable employee who strives for excellence along the most efficient path.

AREAS OF PROFICIENCY
